Profile

Software Engineer with an engineering degree from ESPRIT, specialised in full-stack web development and scalable system design. Experienced in building modern applications, secure APIs, and microservices architectures, with exposure to AI integration and DevOps practices. Seeking an opportunity in an international and innovative environment.

Key Skills

- Full-Stack Web Development: Design, optimisation, and integration of complex applications
- REST/SOAP API Integration and Consumption
- Relational and NoSQL database management
- CI/CD automation and containerization
- Agile methodologies (Scrum, Kanban)

Technical Skills

- **Languages:** JavaScript (ES6+), Java, PHP, Python, SQL
- **Frontend:** React, Angular, HTML5, CSS3, Bootstrap
- **Backend:** Node.js, Spring Boot, Symfony, Laravel
- **Databases:** MySQL, PostgreSQL, MongoDB
- **DevOps:** Docker, Jenkins, CI/CD, Git
- **Architecture:** Microservices, REST APIs, JWT, Keycloak
- **IA/Data :** LLMs (Mistral, LLaMA), fine-tuning, Named Entity Recognition (NER)

Education

Bachelor's degree in mathematics, Tunis (2020)

Sadik High School.

Esprit – Private Higher School of Engineering and Technology, Tunis (2020 – 2025)

Engineering degree in web development and information technology.

Experiences

- **Engineering Thesis – BNS ENGINEERING (Tunis, 2025)**
Designed and developed a foreign trade automation platform integrating an AI-based NLP module, leveraging microservices architecture and secure APIs. Technologies: Spring Boot, Angular, React.js, Next.js, Docker, Jenkins, Keycloak.
- **Software Engineering Intern – Impact Consult (Canada, 2024)**
Developed a full-stack MERN platform with geolocation, user management, and booking/payment features in an Agile environment (Scrum, Jira).
- **Software Engineering Intern – BNS Engineering (Tunis, 2023)**
Built a digital revenue management system using Spring Boot and Angular, implementing secure authentication (JWT) and RESTful APIs.

Projects

- **Job Opportunities Platform (MERN Stack) (2024)** – AI-powered CV analysis and job matching platform.
- **CI/CD Pipeline (Jenkins, 2024)** – Automated build, test, and deployment workflows.
- **University Housing System (Java Full Stack) (2023–2024)** – Development of a student forum (Spring Boot + Angular), improving communication between students and administration.
- **Gaming E-Commerce (Symfony 5) (2023)** – Design and development of an e-commerce platform dedicated to gaming, integrating user management, event management and secure authentication mechanisms.

Certifications and Languages

- **CCNA (2023)**
- **SDG (Sustainable Development Goals, 2024)**
- **Hashgraph Developer Course (blockchain, 2024)**
- French : B2
- English : B2
